DETAILED ACTION

1. This office action is in response to communication filed on 3/15/2007.
2. Claims 61-63 are presented for examination.

Allowable Subject Matter

3. Claims 61-63 are allowed.
4. The present invention is directed to a process for storing and redeeming coupons. The closest prior art are:

Publication titled, Response Reward Systems, Inc. teaches the users pre-selecting coupons. The coupons are redeemed and issued at the POS based on the user's ID.

O'Brien et al.(0 512 509 A) teaches printing coupons based on past shopping activities at a POS.

Barnett (6,336,099) teaches on col. 11, lines 34-44. **"in the alternative, the coupon may be redeemed electronically by sending the coupon data in the buffer via the data communications interface 20 back to the online service provider 2. This is specially useful in the "electronic shopping mall" environment now found in many online services. The electronic coupon data could also be routed via the data communication interface 20 to a retail store where the user will be shopping, where the coupon data is held in a buffer pending purchase by the user of the matching product".**

Based on Board's decision rendered on 6/29/2006, Barnett doesn't teach **"automatically redeeming the coupons"** this patentable feature is present in sole independent claim 61.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
